

To the customers of LBC Sweden

010117/tf

LBC Sweden has developed a **shipment tracking system for furniture retailers and furniture manufacturers**. This system gives You the opportunity to see if a shipment has left the supplier, where in the transport link the shipment is and when it's calculated to arrive to the store. For those suppliers that are sending the information of shipment via EDI, the system generates order- or invoicenummer automatically.

The shipments You are part in as a sender, receiver or if You are the one that pay for the shipment are traced as standard. When clicking on "status" You will receive additional information regarding the shipment.

To receive aforementioned service from our home page **WWW.LBCSWEDEN.SE** You must have Your customer number and a password. We will send out the password after a written request from You in enclosed form. Of course You will handle this password with care!

Please, fill in below form and send to us by mail or by fax and we will return Your password.

Kind regards

LBC Sweden AB
